

# Keeping your EQC works moving

Have you lodged a claim with EQC, been settled by EQC or your insurance company and now need to do the work? Ensuring you have a team of people able to assist you with all aspects of your application is crucial.

You need to be comfortable with the experts you engage, such as structural and geotechnical engineers, builders and architects. WD Build and Hardy Projects can help by:

- Assessing the earthquake damage to your property, proposing an appropriate repair strategy and providing a quote to complete those repairs
- Leading the repair work on your property
- Engaging and managing any necessary specialists or sub-contractors (such as engineers, electricians and plumbers)
- Signing off on the completed work

So, if you're a homeowner in this position and now need to engage a contractor to get things moving along. Just pick up the phone and talk to us about an initial free assessment of your home and we'll make a plan from there.
